Product announcement

FELSENMEER

Always have the right ingredients with you

An appealing presentation of wares in technical sales and distribution contributes significantly to your success. Be it in your store or in the field service, our portable demonstration kit is perfectly suitable for daily use and guarantees an impeccable presentation. We are pleased to introduce our DEMO-CASE FELSENMEER PAS.

DEMO-CASE FELSENMEER PAS

The elements of our personal alarm system are stored in an aluminium carrying case. It is equipped with foam plastic inserts to allow for a clean fit and secure transport. The case measures 460 mm in width, 150 mm in height and 330 mm in depth.

Commissioning

For commissioning our portable demonstration kit you will need SIM cards for each personal-emergency signal device and the Felsenmeer 3G modem. Note that in case of the GSM S EX PLUS device, SIM card insertion is to be done by authorised personnel only. When ordering a demo-case you may provide us with a SIM card in advance. We will then insert that card and ship the demo-case afterwards.

Upon receipt, please follow these steps for commissioning the demo-case:

1. Install the CONTROL CENTER software on your computer.
2. Install the SERVICE-STICK on your computer.
3. Remove the BEACON ECO's battery separation tab.
4. Remove the BEACON EX's battery separation tab.
5. Install and configure the FELSENMEER 3G MODEM.
6. Configure the two personal alarm devices
7. Configure the three locator beacons
